-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Terms such as “advantageously smaller” and “ideally smaller” render the scope of the claims vague and indefinite. In claim 42, “at least one of...” is improper Markush terminology.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Breuer et al '072. Breuer et al '072. Breuer et al disclose a microreactor comprising reaction chambers and heat conveyance chambers, with spacer elements in all the chambers and catalyst material applied to the inside walls of the reaction chambers. (See col. 5, line 10 to col. 8, line 21; Fig. 5 and the description thereof.) The difference between the apparatus disclosed by Breuer et al '072, and that recited in applicants' claims, is that Breuer et al '072 does not specifically disclose that the width-height ratio between adjacent spacer elements should be between 10 and 800. It would be obvious to provide a width-height ratio between adjacent spacer elements of between 10 and

800 in the apparatus of Breuer et al '072, since it would be within the skill of one of ordinary skill in the art to determine a suitable or optimum width height ratio in the apparatus. It would be expected that the width-height ratio would be a result-effective variable in the apparatus.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
